Dear Mister Brown,

I am a 21 years old student at Centrale Nantes, a French engineering school on work-studies basis. I am looking for an at-least 13 weeks I.T. internship, between week 18 and week 34 of 2024 (approximatively may to august).

I am in the I.T. option and I would like to see how I.T. solutions are deployed in a large firm like yours. I think it is important to know how I.T. solutions are deployed to work efficiency and to fully understand the impact an I.T. deployment could have on final users.

I am currently on work-studies basis and I work at SEMITAN, the company that manages the transport network in Nantes, a city of 600.000 inhabitants. There, I work in the infrastructure project management department where I help on all kind of topics, from drafting calls for tenders to technical support. I really enjoy teamwork and I am a very adaptable person.

I would really enjoy doing an I.T. internship in your company and discover the American culture. If you need any further information, feel free to contact me.

Best regards,  
Zoé Eymard
